EXHIBIT 2

RESUME OF MICHAEL F. DOYLE (Page 2)

MARINE EXPERIENCE:

I have been involved with either the construction and/or repair of all types of hulls and rigging. This includes fiberglass, wood, aluminum, steel, and cement. I have sailed on all types of boats from dinghies to 12 meters to maxi ocean racing yachts, on the Great lakes, East Coast, West Coast, Hawaii and the South Pacific. I have delivered both power and sail along both coasts.

I have been involved in over 13,000 various types of surveys since 1973, including 316 strandings/groundings, 207 dismastings 240 collisions and 97 sinkings plus miscellaneous other damage surveys.

Acting as an independent marine surveyor for insurance claims has given me experience with salvage and repair of a great variety of yachts, fishing vessels, passenger vessels, cargo vessels and barges. I am also involved with cargo damage as well as loading and lashing claims for most major U.S. and foreign Marine Insurance Underwriters. I will not knowingly pass any questionable item that may possibly affect either the seaworthiness or safety of the vessel surveyed.

We are dependable.
